Discussion:

Group member updates:

Kacie - Kacie will be working this weekend on the final report, the final presentation, and all manual testing. Will be extremely active in the Discord asking for assistance from others.

Muiz - Will finish editing the new html into the emails, and will finish the challenges page shortly.

Lysa - Lysa will finish up the final APIs she has not completed yet, and will be available to help should other tasks pop up. Will also be attempting to fix streaks, which we learned today aren't actually working all that much.

Elya - Friend request stuff almost working, two fixes needed from Lysa for notification messages since we've changed things with html. Will be working on many things throughout the site per Jira.

Max - Confirmed which graphs we're removing from the My Stats page, discussed quick insights and API requests that need to get implemented for this page. Will work on this page as well as the guest user homepage before the presentation on Tuesday. Will also look over the css of some pages to see if we can get some of them looking a bit nicer.

Robbie - Will be finishing the APIs he has left to do, and will be available to help as required.

Next Time(s):

Meeting - **Monday April 22nd at 3:00pm**

Goal - Practice running through the final presentation, make any final changes to the presentation slides and planned outline. Think of technical issues to report to the profs before marking. Does everyone have their peer evaluations done?

Meeting - **Tuesday April 23rd at 2:00-2:45pm**

Goal - Final presentation with Brendan and Professor Ezzati-Jivan.
