

## Meeting Minutes Apr 2 2024

### Attendees:

Kacie P, Lysa H, Max Y, Elya D, Robert P, Muiz O, Yifan Z

### Goals:

- When will we be doing our final presentation?
  - Brendan sent an email saying presentations are on the 23rd, three time slots are available, 10:00-10:45, 10:45-11:30, and 2:00-2:45.
- What has everyone been working on?
- What will everyone be working on?

### Notes:

- Have not met since last Tuesday (Easter) so there should be lots of updates.
- Kacie will be moving on the 7th so is now in "will not be able to do a lot of work this week" mode.

### Discussion:

#### *Group member updates:*

Kacie

- Will write API requests required for the My Stats page for back-end
- Will need test users for the manual testing, will message back-end when ready
- Will work on the user instruction manual for the final report

Elya

- Working on the user profile page, everything but the password and picture are working. Will make friend requests work but waiting on notifications to be working.
  - When you try to add a friend, email and notification will be sent, and Yifan is working on notifications.

Lysa

- Updated the ER diagram and added the updated test cases on Progress Report 2.
- If she has time, will work on the notifications API.

Muiz

- Working on the challenges page with the popups, also working on the leaderboard page and implementing the APIs, will continue working on that.
- Will try to put the email sending function in its own file so it can be accessed by other files.

Max

- Continued working on updating css for pages, is trying to get checkboxes to look customized.
- For the dailies page, the habits:
  - The design is the overpass font while everything else is in a different font, what fonts should we use?
    - Conclusion is to do both of our two common fonts and see how they look, then make a decision.

Yifan

- Problem with the Dailies page - date, still need to be able to see the previous day's habits. A calendar/date picker will need to be implemented, and the APIs will need to be updated.
- Still working on the notifications page, also still working on the dailies page (debugging + final features mostly, will work on other pages as needed).

Robbie

- Added the additional functionality into the check-in functionality for date, and also got the trigger function working to update the habit's streak when check-in is implemented.
- Still working on updating APIs, Stats page APIs when Kacie has written them.

For settings, everyone will need to make new accounts to make their settings entry.

Next Time(s):

Meeting - **Friday Apr 5 at 3:00pm**

Goal - What progress have we made? What will everyone be working on next?
