

Sprint 3 Planning Meeting

Mar 19 2024

Attendees:

Kacie P, Lysa H, Yifan Z, Muiz O, Robert P, Elya D, Max Y

Goals:

- Plan and assign all tasks for sprint 3.
- What tasks do we need to prioritize for this Sprint? What will be OK if it doesn't get done by project submission time?

Discussion:

We went through all remaining tasks in Jira (this is our final sprint) and ordered them by priority, as well as assigned them to the appropriate people. We chatted about a few of the requirements, and what they entail. We deleted any tasks relating to the journal page.

Priorities discussed for the beginning of Sprint 3:

- Elya will try to work on the email verification portion, and will finish the user profile page implementation.
- Max will work on the settings page and group habits (challenges) pop-ups.
- Muiz will finish the username length restriction on the sign-up page, and finish the leaderboard page connection to the back-end.
- Kacie will assign the "My Stats" page to Muiz and fully focus on reports, meetings and deliverables (Progress Report 2 due on April 1st).
- We really want everything to work on mobile so we will need to focus on this (Elya will take the lead).
- Yifan will continue perfecting the dailies page and work on the notifications pop-ups.
- Yifan and Lysa will continue rocking the back-end requirements as required by front-end people.

Notes:

We are planning on having "everything" done for April 9th because there's some stuff that needs everything else done before that date (user manual, guest user homepage, reports, tutorial video...).

Kacie will be moving on April 7th, so will be mildly unavailable in the days before and after.
