

Meeting Minutes Feb 7 2024

Attendees:

Kacie P, Lysa H, Yifan Z, Muiz O, Robert P, Elya D, Max Y

Goals:

- Check in on everyone's progress
- Discuss challenges and next steps
- Discuss how we will be letting each other know when we are working on something so no one is duplicating work

Discussion:

What has everyone worked on since Friday?

- Elya worked on many designs in Figma (mobile, homepage, add/edit habit popups, challenges)
 - We went through the designs and finalized some of them. Challenges design isn't finalized since that isn't technically until sprint 2.
 - For the home page design, we decided to remove obvious buttons from the homepage, but the dialogue boxes will be clickable as an alternative to the navigation bar.
- Kacie designed the sign up page (also finalized) and made some small changes to the dailies page design.
- Max was working on Dailies implementation, and didn't get far.
- Robbie was finishing setting up configuration for the database (as to not share IDs to public GitHub).
- Lysa was doing some test get requests and worked on setting up the database.
- Yifan did the navigation bar login page.
- Muiz also worked on the login page.
 - Everyone CHECK JIRA. We don't want anyone duplicating work. Talking about what we are working on in Discord is great, but Jira should be the word of law when it comes to who is working on what.

What will everyone work on for this week?

- Kacie will help find past code dealing with email verification, look back at 4P01 notes to see what UML diagrams we should create, and start setting up the structure for the first progress report. Also will design the user profile page if there is time.
- Lysa + Robert will hopefully be getting the tables for the database created and connection to the site working.
- Yifan + Max will collaborate on getting the Dailies page started, using test users/data.
- Muiz will be finishing implementation of the sign-up and login pages.
- Elya will be working on implementing the homepage.

Next Time:

Meeting - **Friday Feb 9 at 3:00pm**

Goal - Check in on how everyone is doing. Do we have the database set up?
