Discussion:

Group member updates:

Kacie was moving, did not have any updates, but will have much more time to work before Friday's meeting.

Elya has no updates.

Lysa was brainstorming for the notifications API, and has a bunch of questions.

- Triggers are not possible, so how are we sending emails?
 - Just trigger on login to generate all of the notifications.
 - We will not be able to send an email every day.

Muiz did the email function (PR submitted), and worked on the challenges page but it's not ready. Will go on to add emails in the user profile page (updating email/password confirmation).

Max has been finishing the settings page, implemented the APIs but still needs to test. Will finish settings and work through the stats page and the css of the dailies page.

Yifan will hopefully finish the dailies page tomorrow, and is waiting on the notifications APIs so he can work on the notifications popup next.

Robbie finished the dailies API, will be working on stats APIs.

Free poutine @ Brock tonight at 7pm, group hang out!
