Meeting Minutes Mar 22 2024

<u>Attendees:</u>
Kacie P, Lysa H, Max Y, Elya D, Robert P, Muiz O
(Yifan Z absent)

<u>Goals:</u>
- Follow up after Progress Report 2 meeting with Brendan. How did it go? Go over his feedback and update Jira accordingly.
- What has everyone been working on?
- What will everyone be working on?

<u>Discussion:</u>
Presentation went really well! Next presentation is the final presentation (scheduled ~1 week before, probably).
We talked about automatic testing in the front-end, but we already have a lot of manual testing so we shouldn't have to do this much (but would be nice).
People need to keep AI usage in mind, and write down a list of prompts they are using and citations in order to display how we are using AI to help for the final report.
To get the full 5 bonus marks, we may need to consider publicly hosting the site. We will determine this when we get closer to the end, if we have time.
What has everyone been working on?
- Kacie will finish the report and work on manual testing
- Lysa will be helping with emails on Sunday, has many assignments this weekend
- Muiz will try to finish challenge page pop ups and implement leaderboard APIs with Robbie or Lysa
- Max will be working on connecting the settings page to the back-end
- Elya will be working on user profile page, implementing APIs, might also look into sending out emails
- Robbie is finishing check-in functionality, has an untested implementation which was pushed to development today
    - Potentially changing the way we're doing check-ins, might include separate field to habit that keeps track of if it's completed for the day to try to reduce the number of calls

<u>Next Time(s):</u>
Meeting - **Tuesday Mar 26 at 5:00pm**
Goal - What progress have we made? What will everyone be working on next?
