Meeting Minutes Mar 19 2024

<u>Attendees:</u>
Kacie P, Lysa H, Max Y, Yifan Z, Elya D, Robert P, Muiz O

<u>Goals:</u>
- Sprint 2 Retrospective meeting. What went well? What didn't? Goals for Sprint 3?
- Sprint 3 Planning meeting. Are we on pace to finish everything on time? Cutting back scale for Sprint 3? Who will be assigned which tasks? What is a priority?
- Progress Report 2 Meeting with Brendan is on Friday (3 days). Who will be presenting what? When are we updating the main branch?
    - Has everyone accepted the Progress Report 2 Meeting invitation from Brendan?

<u>Discussion:</u>
Please see separate Sprint 2 Retrospective Meeting notes for this portion of the meeting.
Please see separate Sprint 3 Planning Meeting notes for this portion of the meeting.
What is the front-end's progress on the in progress tasks (for Sprint 3 Planning)?

> Muiz - basic designs for leaderboard and challenges are working (needs friends/challenges API for getting info), just need to populate with information from the backend. Verification is working, but emailing is not, he is going to check out the link Kacie sent today and see what he can do to complete it by the end of the week.
> Yifan - Still working on notifications popup, waiting for backend to have the tables/APIs done, dailies page is still not 100% done because there's still a lot to do on this page as far as bugs go, check-in still needs to be implemented and prevent users from checking in constantly.
> Max - Max has been working on the settings page, still needs to finish up a few more things and then has to connect it to the backend, might be able to get the front-end part done before the day with Brendan.

- Group challenges:
    - The "Create Challenge" pop-up needs to be closer to the pop-up for creating a habit, since these are basically the same implementation. Max will help Muiz with this page.
    - Group challenges need to get added to the dailies page as a regular habit for tracking and check-ins.
- Random quotes: have an array of random quotes, cycles through the array every day? On page reload? Might be able to pull from API - Elya is assigned to look at this later into Sprint 3. Currently there is an array implemented for the User Homepage, but not the Sign-In page.
- The Dailies page is waiting on check-in APIs, and needs to be prioritized by the back-end team.

We did not get time to discuss the meeting with Brendan on Friday (meeting ran too long!) so we will be meeting again tomorrow to finish up everything we wished to discuss today.

<u>Next Time(s):</u>

Meeting - **Wednesday Mar 20 at 3:00pm**

Goal - Discuss the meeting with Brendan on Friday - who will say what? Update the presentation notes. Also provide updates on the state of Progress Report 2. Everyone should be adding in their contributions in the end. When will we be updating the main branch? Do we need to do this for Brendan? Has everyone accepted the Progress Report 2 Meeting invitation from Brendan?

Meeting - **Friday Mar 22 at 3:00-3:30pm**

Goal - Progress Report 2 Meeting with Brendan. Update him on our progress since the first report. Get feedback on the site and on our progress as a group.
